PROFESSIONAL SUMMARY

Results-driven Data Scientist, AI/ML Professional, Financial Analyst, and Chemical Engineer with a multidisciplinary academic foundation spanning Chemical Engineering, Financial Engineering, Data Science & Business Analytics, and Computer Applications. Adept at building end-to-end machine learning pipelines, applying statistical and quantitative modelling to complex datasets, and translating data insights into actionable business and financial value. Experienced in chemical process analysis, experimental design, and industrial problem-solving. Proven ability to bridge engineering rigour, financial acumen, and computational intelligence to deliver impactful solutions across industrial, financial, and technology domains.

CORE COMPETENCIES

Machine Learning & Deep Learning: Python · TensorFlow · Scikit-learn · Keras

Data Science & Analytics: Statistical Modelling · Business Analytics · Predictive Modelling

Financial Engineering: Quantitative Analysis · Risk Modelling · Financial Data Analysis

Data Engineering: SQL · Data Wrangling · ETL · Feature Engineering

Chemical & Process Engineering: Process Simulation · Experimental Design · Chemical Modelling

Visualisation & Storytelling: Matplotlib · Seaborn · Power BI · Dashboard Design

Project & Research Skills: Research Methodology · Project Management · Technical Writing

Soft Skills: Cross-functional Collaboration · Communication · Adaptability

PROFESSIONAL EXPERIENCE

Machine Learning Intern

YBI Foundation · New Delhi, India (Remote) · May 2025 – Nov 2025

- Designed and executed end-to-end data preprocessing pipelines, improving model-ready dataset quality by eliminating inconsistencies and handling missing values across large datasets.
- Developed and fine-tuned supervised learning models using Python, TensorFlow, and Scikit-learn to deliver predictive analytics solutions aligned with project KPIs.
- Collaborated cross-functionally with senior data scientists to analyse complex datasets, extract actionable insights, and present findings to stakeholders.
- Conducted systematic literature reviews on state-of-the-art ML techniques, integrating best practices into ongoing model development cycles.
- Contributed to model evaluation frameworks using metrics including accuracy, precision, recall, F1-score, and AUC-ROC to benchmark algorithm performance.

Chemical Engineering Intern

Taako Industries · Douala, Cameroon · Feb 2020 – Apr 2020

- Executed controlled experiments to evaluate chemical process performance and product formulation efficacy, recording quantitative observations for engineering review.
- Partnered with senior engineers on data collection, statistical analysis, and interpretation of experimental results to support continuous process improvement.
- Contributed to the formulation and manufacturing optimisation of powder detergent products, applying chemical engineering principles to enhance product yield and efficiency.

EDUCATION

Post-Graduate Certificate in Data Science & Business Analytics (2025)

University of Texas at Austin · USA

Master of Science – Financial Engineering (In Progress)

WorldQuant University · New Orleans, USA (Online)

Master of Computer Applications (MCA)

In Progress / Planned

Bachelor of Science – Chemical Engineering (2022)

Catholic University Institute of Buea · Cameroon

KEY PROJECTS & TECHNICAL ACHIEVEMENTS

- Built end-to-end predictive ML models leveraging Python and TensorFlow for classification and regression tasks during YBI Foundation internship.
- Applied chemical process simulation techniques from Chemical Engineering background to model system behaviour — directly transferable to industrial AI/ML applications.
- Developed a data science e-portfolio showcasing applied projects across ML, analytics, and visualisation: mygreatlearning.com/eportfolio/bisong.
- Conducted quantitative research integrating financial engineering methods with data analytics frameworks to support risk assessment modelling.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Post-Graduate Certificate – Data Science & Business Analytics · University of Texas at Austin (2025)
- MS Financial Engineering (In Progress) · WorldQuant University
- Continuous self-directed learning in Deep Learning, NLP, and AI Engineering via Great Learning and industry platforms.
